CITY OF GLASGOW COLLEGE

City of Glasgow College Wi-Fi Connecting on Mac OS X Devices
Wireless Network: eduroam

The wireless network **eduroam** is available at our Riverside and City Campus sites and Halls of Residence. Eduroam is a secure wireless service which has been developed for the education community. College students and staff as well as visitors, from participating organisations, can use the eduroam wireless network which allows filtered Internet access.

This network is filtered as per the College's Acceptable Use Policy. When you connect to the College network, you are agreeing to the terms of the Acceptable Use Policy and the Janet eduroam UK policy (copies are available on request).

How to access eduroam:

➢ Your device must support WPA2 Enterprise in order to be able to connect to eduroam.

➢ Ensure Wi-Fi is enabled. Click on the **Wi-Fi menu icon** 📶 and click on the wireless network **eduroam** to connect.

➢ You will be prompted to enter a username and password. Enter the same username and password that you use for connecting to the College network followed by **@cogc.ac.uk** at the end of your username.

> **Identity:**
> **Students:** MyCity username e.g. **123456@cogc.ac.uk**
> **Staff:** College network username e.g. **asmith@cogc.ac.uk**
> **Password:** Your My City/ College network password

➢ Click **Ok** on the 802.1X authentication pop up window after you have entered your username and password.

➢ If you are prompted with a **QuoVadis** security certificate for **RIV-0M-ISE-01.cogc.ac.uk**, you must accept this certificate by clicking **Continue** to proceed.

➢ Once you are successfully authenticated, you will automatically connect to **eduroam** within the College and at other **eduroam** institutions, without having to re-enter your username and password.

➢ If you have any questions, or need any help, please contact the Operations Helpdesk on 0141 271 6600.
